Product Leadership

Phone (17.2%) generates the highest revenue, followed by Monitor (16.2%) and Printer (14.3%). These three products account for 47.7% of total revenue. Strategic focus should be on ensuring adequate inventory and promoting these products.

Payment Preference

Debit Card dominates (22.6%), followed by Credit Card (21.4%). Cash and Online payments show nearly equal adoption (18.8% and 18.7%). Consider promoting digital payment options to reduce cash handling costs

Weekly Pattern

Tuesday (₹123,388) and Thursday (₹122,934) are peak days, while Sunday/Monday are likely weaker. Consider strategic promotions on weaker days and optimize staffing around mid-to-late week peaks.

Store Performance Gap

S9 leads with ₹87,997 (12.4%), while S6 lags with ₹53,864 (7.6%). The 34-point variance indicates significant performance differences. Recommend analyzing S9's operations for best-practice replication across lower-performing stores.

Time-Based Demand

Evening (40%) significantly outperforms afternoon (36%) and morning (24%). Recommend allocating maximum staffing during evening hours and implementing targeted promotions during morning/afternoon to boost slower periods.

Overall Health

600 transactions generating ₹707,221 with average transaction value of ₹1,179 indicates healthy business performance. Focus on product mix optimization, store performance equalization, and time-based staffing adjustments for maximum efficiency.
